

UNITO LAVA SMART WATER SYSTEM

TECHNICAL SPECIFICATIONS

UNITO.LAVA water system	
Dispensing water types	Boiling water, mixed, cold/hot tap water
Boiling water tank capacity	4.4 Litres
Heating-up time	15 minutes (from 25°C to 100°C)
Min./Max. mains pressure	2/5 bar (200/500 kPa)
System max. safety pressure	8 bar (800 kPa)
Max. hot water temperature	100°C
Operation	Operation via mechanical control knob, handle
Power supply	220V-240VAC 50/60Hz
Max. power consumption	1550 W
Standby power consumption	0.35 W
Safety features	Maximum temperature fuse, Safety valve (with a cut-off, relief valve, a built-in non-return valve)
Tank Dimensions	219 x 366 x 279 mm (L x H x W)
Empty tank weight	4KG
Full tank weight	8.4KG
Flow rate	2.5 L/min
Max. water hardness	10° dH
